

Alestalo × Judin × Väre

# Alestalo × Judin × Väre

09th - 14th April 2019  
Salone del Mobile, Salone Satellite  
Booth D09

We are a group of three friends and designers. Similar goals, values, working methods and sense of humor have naturally led us to cooperation. Our theme for the Salone Sartellite 2019 exhibition is Contrasts and Illusions: We will present pieces of furniture and lamps that challenge the viewer through shapes and colors.

Cover  
Halo lamps, design Lassi Alestalo  
Ebba sofa, design Laura Väre  
Ombre mirror, design Henri Judin

## **Hug** plant holders

Give a Hug for your green friend. Hug is a series of plant holders that consists of many different sized parts. By combining them you can create a wide range of Hugs for your plants.

Design  
Lassi Alestalo

## **WARP** shelves

WARP is the outcome of my research of how to implement optical illusion in a structure of a piece of furniture. WARP is a two-level wall mounted shelf that is mounted on the wall with four screws.

The source of inspiration rises from OP art and artists such as Victor Vasarely and Bridget Riley.

The way the steel structure is bent creates an art-like piece against the wall and borders the products on the shelf. The structure isn't only a visual effect, but it also makes the structure stronger.

Design  
Henri Judin

## **Ebba** sofa

Ebba is an elegant and curvy sofa with green velvet upholstery and brass details. The form language of the sofa is playful yet strictly geometric. Ebba is a two seater sofa that suits perfectly both for homes and public spaces.

Design  
Laura Väre

## **Halo** pendant lamps

Halo pendant lamp is a beautiful object alone or in a group. There is a flat part made of brass inside the lamp shade and the light makes the brass glow. Halo looks different depending on where you look at it - By changing the viewing point Halo gives you again something new.

Design  
Lassi Alestalo

## **Barcode table**

Code is a customisable collection of tables with different sizes for different purposes. First two pieces of the collection are Sofa table Code and bar table Barcode. All the table tops fit together with all the different legs. Code collection is follow-up for my previous collection Parallel Universe where I explored horizontal and vertical structures and the dialogue between them.

## **WARP bar stool**

My long-lasting ambition has been to combine two of my passions: furniture design and optical illusions. The purpose of the existence of the WARP stool is to prove that not everything in this world is how they might first appear. The way the steel structure is bent make the appearance variant from different angles. The structure isn't only a visual effect, but it also makes the structure stronger.

Design  
Henri Judin

## Po mirrors

Po is a mirror collection with simple geometric frames and a small round loop for hanging the mirror on the wall. The black powder-coated metal frame gives the mirror a light and graphic character. Po is a versatile mirror that looks beautiful both alone and together with other Po mirrors.

Design  
Laura Väre

## **Mood** tables

Mood sofa tables give you something more. The reversible table top is easy to set on the frame. It's fast to change the mood of the table just by turning the table top around. Edges down Mood is a more conventional sofa table, like a table with a tablecloth on it. Edges up the table top is like a crown and can also be used as a tray.

Design  
Lassi Alestalo

## **Ombre** mirrors

Ombre (=shadow, French) is a collection of wall-mounted mirrors that are also decorative wall elements. The steel structure next to the mirror imitates the long shadows during autumn and spring, before and after the polar nights, when the sun shines right above the horizon.

Design  
Henri Judin

## Hide lamps

Hide is a playful lamp collective with a fringe detail. The contrast between hard metal and soft fringes create an expressive look. Light filters through the fringes softly, creating a moody light. The Hide lamps looks great individually and when hung in clusters. Hide lamp collection consists of floor lamps and pendant lamps.

## Eden plant box

Eden plant box is a platform for plants and a fun storage for books and other small objects. Due to its modern minimalistic look it suits in various spaces, creating greenness around it. Eden is made of powder-coated steel and the base is suitable for both indoor and outdoor use.
